4-yard Front Load Container

Poli-Tron has come up with the best of both worlds in containers, metal & plastic! Our new four-yard container has the same metal & plastic design as our two-yard but comes with two independent heavy wall plastic liners. Both liners are replacable if they should ever get damaged. The metal frame is a bolt together design which enables us to cost effectively ship these containers almost anywhere, plus this makes every component replaceable. These units are easily assembled and you can order your steel frames in the colors you desire.

Pricing is available upon request.
